**NetEnterprise Buys Computer Doctor Hawaii
Acquisition expands repair and warranty capabilities**

Honolulu, HI – NetEnterprise, Inc. announced it has purchased the assets of Computer Doctor Hawaii, a computer, printer and plotter repair company located in the Nimitz Business Center at 1130 North Nimitz Highway. The price of the sale was not disclosed. All members of the Computer Doctor Hawaii staff will continue working for NetEnterprise.

Benny Mateo, NetEnterprise president and CEO, stated. “The Computer Doctor acquisition enables us to significantly enhance our market presence in the computer repair and warranty business. NetEnterprise had been providing computer repair and warranty for years, but as an add-on to our desktop and network support services. By dedicating technical resources to better address client needs, the acquisition will now allow us to focus on the repair business as a stand-alone service center.”

Mateo continued, “The acquisition will be mutually beneficial for the clients of both company’s. Our clients at NetEnterprise will benefit from Computer Doctor’s engineers and their wide range of capabilities in computer, printer and plotter repair, while Computer Doctor’s clients will enjoy instant access to the NetEnterprise IT team who will provide them the best networking and IT solutions in the state. Computer Doctor also holds a dominant position in servicing and repairing the plotters used by engineering and architectural firms.”

-- more --

Bud Challenger, a founder of Computer Doctor Hawaii and now part of the NetEnterprise management team, said, “My partners and I started Computer Doctor because of our ongoing frustration with the service we were experiencing in printer and computer repair. The employees at most repair shops insist on speaking to customers in technical jargon and don’t recognize that the data on a customer’s hard drive is one of their most precious possessions and often contains irreplaceable business and personal documents and records. The philosophy adopted at Computer Doctor was one that made effective customer communication a priority and emphasized preservation of our customers’ valuable data.”

About NetEnterprise

Founded in 1996, NetEnterprise is a leader in providing computer network integration, operations support systems, and Internet connectivity solutions. Throughout Hawaii and the Pacific Rim, NetEnterprise currently provides IT solutions and support to commercial businesses, federal, state and county governments, and non-profit organizations.
